Art Unit: 1653

Claims 1-5 are currently pending and are under examination.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-5 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed proteins and nucleic acids are not claimed as being isolated or purified.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Each of Claims 1-5 refer to Sequence No. and not to SEQ ID NO: as is required – see 1.821.

Claims 1 and 4 are drawn to a protein having the amino acid sequence of SEQ ID NO: 1 or SEQ ID NO: 2. SEQ ID NO: 1 and NO: 2 are nucleotide sequences. Therefore, the reference amino acid sequence is not clear.

For the purposes of the remaining rejection, Claim 1 will be taken to read:

1. An isolated protein containing the amino acid sequence depicted as amino acid residues 27 to 86 of SEQ ID NO: 3.

For the purposes of the remaining rejection, Claim 4 will be taken to read:

4. An isolated protein containing the amino acid sequence depicted as SEQ ID NO: 3.

Art Unit: 1653

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-5 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 9, 11, and 12 of prior U.S. Patent No. 6,280,968. This is a double patenting rejection.

Instant Claim 1 is identical to patent Claim 9(b) and Claim 6 having dependency from Claim 1(e).

Instant Claim 2 is identical to patent Claim 1(a) and 11.

Instant Claim 3 is identical to patent Claim 1(a) and 11.

Instant Claim 4 is identical to patent Claim 9(a) and Claim 6 having dependency from Claim 1(d).

Instant Claim 5 is identical to patent Claim 1(b) and 12.
